Venue: SIPMM @Trade Association Hub

Price: \$880 (Member) | \$980 (Public)

## Programme Outline

What Is Sustainable Procurement?

ISO 20400 Framework Deep Dive

Green vs Sustainable Procurement

The 3 Pillars:  
Environment, Social, Economic

Singapore & Global Policy Context

Supply Chain & Category Management

Digital Tools & AI in Sustainable  
Procurement

Implementation Roadmap & Action  
Planning

## Overview

Sustainable procurement helps organisations balance cost, quality, resilience, and sustainability in their supply chains. This programme equips participants with practical knowledge of sustainable procurement, ESG integration, and the ISO 20400 framework. Participants will learn to apply ESG considerations in supplier selection, tenders, contracts, and procurement decisions. The programme also covers risk management, life-cycle costing, digital procurement tools, and future procurement trends.

Through case studies and practical applications, participants will gain the skills to develop responsible, resilient, and future-ready procurement practices.

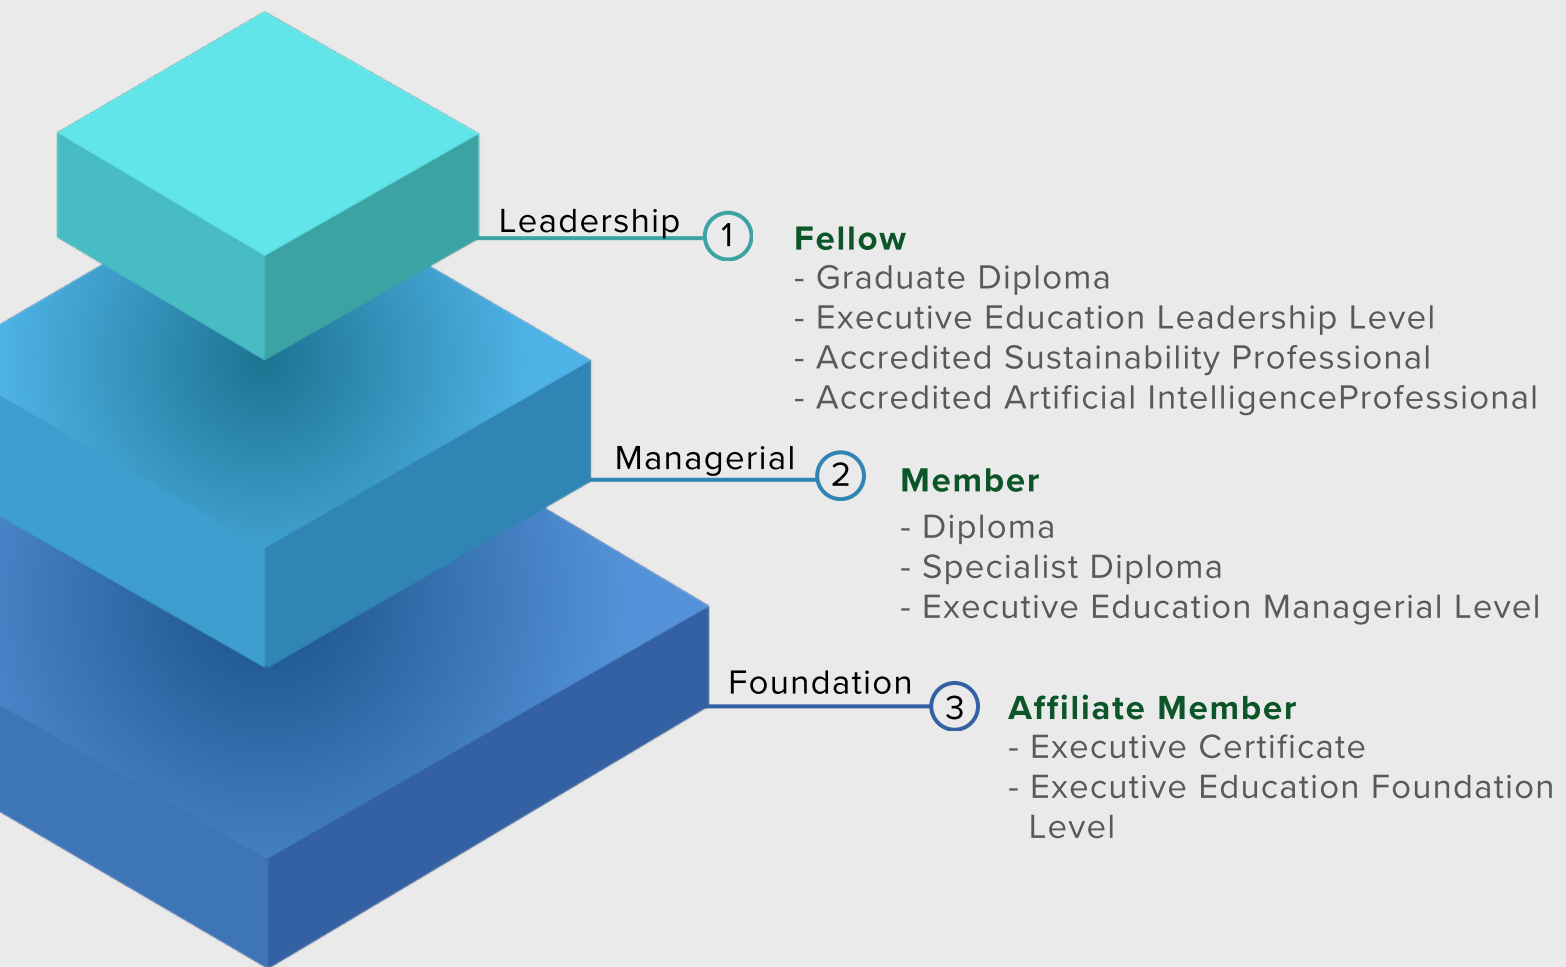

## Who should attend?

Managers, Executives, Supervisors, and those who seek to integrate sustainability into procurement practices across the following industries or sectors.

## Programme Levels

Sustainable Procurement

## Professional Accreditations

**ASP™** Accredited Sustainability Professional

**AIP™** Accredited Artificial Intelligence Professional

The professional accreditation is a professional certification conferred on professionals and certifies the holder's vast Experience, Skills and Competence in the profession.

The ASP™/AIP™ is jointly awarded by the Logistics Institute of Singapore and Singapore Institute of Purchasing and Materials Management, and is recognised as an accredited qualification for Chartership.

## Chartered Designation

Chartered Designation Award is a professional certification and accreditation conferred by the **Chartered Institute of Logistics & Procurement (CILP)**, a chartered institution of the **World Certification Institute (WCI)**. It is awarded to individuals who have demonstrated a high level of knowledge, skills, and experience necessary to excel in their field or industry of logistics, procurement, and supply chain management.

Chartered designations are widely recognised globally by employers and other professionals in the logistics, procurement, and supply chain management fields. They signal that an individual has met a high standard of excellence and is qualified to work in the field.

**CSM™**

CHARTERED  
SUPPLY CHAIN MANAGER

**CPM™**

CHARTERED  
PROCUREMENT MANAGER

### ELIGIBILITY CRITERIA FOR CSM™ AND CPM™

Hold an active **Professional Accreditation (ASP™/AIP™)** or an approved equivalent.

Attain **5 Certificates of Competency (CoC)** at the managerial or leadership level.

Presidents or Chief Executive Officers may be considered for admission under **exceptional circumstances**.

# About SIPMM

## Background and Publications

Singapore Institute of Purchasing and Materials Management (SIPMM), is the nation's professional body for the LPS sector - the sector which includes professionals in Logistics, Procurement and Supply Chain. Since its founding in 1972, SIPMM has trained over 100,000 professionals through its comprehensive suite of Qualifications and Programs across the region which includes Multinational Firms, ICT Conglomerates, Governments, and the Armed Forces.

SIPMM is recognized for developing the Official Singapore Purchasing Managers' Index (PMI) in 1998, and the Official China PMI in 2002. The Official Singapore PMI is the key barometer of the Singapore Manufacturing Economy, while the Official China PMI is widely regarded as a reliable indicator of the China Manufacturing Economy.

SIPMM graduates regularly publish professional articles relating to logistics and supply chain management. The publications cover contemporary issues that are relevant and crucial to the LPS profession. They include critical areas of global importance, such as disaster logistics, cold chain logistics, warehouse hazards and risks, supply chain sustainability, procurement fraud and adoption of digital technologies.

- Key Success Factors for Logistics Integration - Tan Wei Seng
- Key Strategies for Logistics Cost Reduction - Liaw Chin Thean
- Major Considerations for Energy Procurement - Joanne Chin Shel Weh
- Tools and Techniques to Rationalise the Supplier Base - Nur Farizah Omar
- Key Benefits by Integrating Blockchain and AI Technologies - Jayana Das
- Integrated Technologies for Global Distribution Centers - Lee Wen Kien
- Best Practices for Food and Beverage Warehousing - Ang Kok Chai
- Important Considerations for Healthcare Warehousing - Chew Chee Kien Louis
